SourcePoint™
Platform for Software Debug and Trace

SourcePoint™ for Intel®
Release Notes 7.10.2.213
July 1, 2015

New Features

SourcePoint Server Licensing – SourcePoint now is supported on a subscription model. This model allows the customer all the features at one low price.

Intel Processor Trace Support – Added support for Intel Processor Trace (Intel PT). See the Trace view section for more information.

Trace Search View - The Trace Search view has been added to support Intel PT. This view supports high level views of the trace. The view can be opened from the Trace view context menu.

Trace Statistics View - The Trace Statistics view has been added to support Intel PT. This view supports function profiling of instruction trace data. The view can be opened from the Trace view context menu.

UEFI Macro Update – New macros and updates for navigation and debug of the current EFI distribution

New Processor Support

Intel® Rangley
And other new processors from Intel (NDA required)

Python Support

Python 2.7 now supported
HSW CScript support
CScript support for CSR read/write
For the most update CScripts supported in this release contact your local FAE.

New Run Control and Trace Port Analyzer Support

Arium ECM-XDP3e
Arium LX-1000e

Processor Support

Atom, Atom-CE	Brantley
BayTrail1C/2C/4C	Haswell
BoxboroEX	HaswellEX, HaswellEP-2S
Broadwell 2C	Nehalem1P/2P/4P
Braswell4C	Romley
Brickland	SandyBridge1P/2P/4P
Cedartrail	SandyBridgeEP
Cherry Trail	SharkBay
Core1P/2P/4P	TunnelCreek
Denlow	Ivytown
Edisonville2C/4C/8C
